LAUNCHKIT — QUICKSTART GUIDE

Build. Launch. Scale.

Version 1.0 · 2026

WELCOME

Welcome to NIAKX LaunchKit

Thank you for picking up LaunchKit. You now have everything NIAKX uses internally to give a new product a credible, consistent identity — brand assets, a ready-to-publish landing page, a pitch deck template, and an AI prompt collection — packaged so you can go from download to live in under an hour.

This guide walks through what's in the box, how to install it, and how to use each piece. Keep it nearby the first time you open the kit; after that, you'll mostly reference the Brand Guide included alongside it.

New to LaunchKit? Read this guide top to bottom once before opening any files — it takes about five minutes and will save you time later.

PACKAGE CONTENTS

What's Included

LaunchKit is organized into four parts. Each lives in its own folder inside the package you downloaded.

- ✓ **Brand Kit** — Primary, Light, Dark, Symbol, and Favicon logo files (SVG), plus the full NIAKX Brand Guide (PDF) covering color, typography, and usage rules.
- ✓ **Landing Page** — A complete, ready-to-publish HTML landing page pre-built with the NIAKX visual identity — colors, type, and logo already in place.
- ✓ **Pitch Deck** — A 20-slide investor and partner presentation template (PowerPoint), styled to match the brand system.
- ✓ **Prompt Collection** — 200 ready-to-use AI prompts across marketing, branding, copywriting, sales, product, social media, and business strategy.
- ✓ **Documentation** — This Quickstart guide, the software license, and a README describing the full package.

SETUP

Installation Steps

LaunchKit requires no build tools, dependencies, or accounts to get started. Everything works straight out of the folder.

1 Download and unzip

Extract the LaunchKit .zip file to a folder on your computer. Keep the folder structure intact — files reference each other by relative path.

2 Review the README

Open README.md to see a full map of the package and confirm nothing is missing from your download.

3 Open the Brand Guide

Open NIAKX_Brand_Guide.pdf inside the Brand Kit folder for the complete rules on color, typography, and logo usage before editing anything.

4 Start with the Landing Page or Brand Kit

Jump to whichever section fits your immediate need — the two sections below cover both.

How to Open the Landing Page

The landing page is a single, self-contained HTML file with its styling built in — no installation or server required to preview it.

1 Preview it locally

Double-click `index.html` inside the Landing-Page folder. It will open directly in your default browser exactly as it will appear live.

2 Edit the content

Open `index.html` in any text or code editor (VS Code, Sublime, or similar) to update headlines, copy, and links. Structure and styling are already in place — only the text needs your input.

3 Publish it

Upload the file to any static hosting provider (Netlify, Vercel, GitHub Pages, or your own web host) — or hand it to a developer to integrate into an existing site.

Don't have a hosting provider yet? Netlify and Vercel both offer a free tier that can have the page live at a public URL in under five minutes.

How to Use the Brand Kit

The Brand Kit folder contains every logo file and the rules for using them correctly. Read [NIAKX_Brand_Guide.pdf](#) in full before applying any asset to a customer-facing surface.

- Use [NIAKX_Logo_Primary.svg](#) for light backgrounds with enough horizontal space (headers, documents, decks).
- Use [NIAKX_Logo_Light.svg](#) on dark backgrounds, and [NIAKX_Logo_Dark.svg](#) for single-color print or engraving.
- Use [NIAKX_Symbol.svg](#) — never the full wordmark — for app icons, social avatars, and anywhere the space is square or circular.
- Use [NIAKX_Favicon.svg](#) for browser tabs and bookmarks; it's pre-optimized for legibility at small sizes.
- All files are vector (SVG) and scale to any size without quality loss — resize freely, but never stretch non-uniformly.
- Match the color palette and typography specified in the Brand Guide when creating new materials — don't introduce colors or fonts outside the system.

LEGAL

License Summary

LaunchKit is distributed under a commercial license. The summary below covers the essentials — the full terms are in LICENSE.txt, included in this package.

- ✓ **Personal and commercial use** — Allowed. Use LaunchKit for your own projects or your clients' projects, without restriction on the type of use.
- ✓ **Modification** — Allowed. Edit, restyle, and adapt any file to fit your project.
- ✓ **Redistribution** — Not allowed. Don't share, publish, or hand off the original LaunchKit files as a standalone package.
- ✓ **Reselling** — Not allowed. The original files can't be resold or repackaged as a competing product.
- ✓ **Credit** — Not required. You're free to use LaunchKit without attributing NIAKX publicly.
- ✓ **Updates** — Included for the lifetime of the product, at no additional cost.
